## **Value Based Education– Remedy to Decrease Crime.**

Respected Chairman, Hon'ble Judges and Dear audience. I'm here to present my views that Value Based Education is the only Remedy for Decreasing Crime rate amongst the educated folk.

The headlines of the daily newspapers are filled with gory details of the crimes committed by educated gentlemen. We often hear of chain snatching, shop lifting, stabbing, kidnapping and robbery. Murder for the money is the latest phenomenon indulged in by anti- social elements. It is said that unemployment and poverty force the youth to adopt criminal activities. But recent incidents have revealed that young boys belonging to good families and respectable parents also indulge in criminal activities such as thefts, borrowings and car- lifting. Devoid of parental care and control these youngsters crave for fun and adventure. The foreign action films thrill their minds and lead them to emulate some of the tricks of their favorite heroes. If we are keen enough to decrease the crime rate amongst the educated youth. We must bring a radical change in our system of education. We must inculcate in students the respect for values and good qualities such as honesty, truthfulness, trust, kindness and self-sacrifice. Employment opportunities should always be increased to channelize their energy.
